

Method for applying heat shrink tubing to optical fiber cables

Overview

Place Heat Shrink Tubing: Slide the appropriate size heat shrink tubing over the cable ends that need to be sealed. Apply Heat: Use a heat source, such as a heat gun, to evenly apply heat. A user might want to know the step-by-step process of sealing the cables using the heat shrink method with the COMMScope F84540-000 A8 Fiber Optic Splice Closure. They may be looking for guidance on how to ensure a secure and reliable seal to protect the spliced fibers from environmental elements. ↗ Level Up Your Fiber Skills – Join the One Up Techs Skool ☐☐ <https://www.com/oneuptechs> In this video, I will be explaining my techniques for entering a new cable into a Live 400D Commscope FOSC as well as a few other tips and tricks throughout the video. Thanks for watching Please I ↗ Level. excessive pulling, bending, and crushing forces. Do not bend the cable more harply than the minimum recommended bend radius. Its quite a technical process and interesting to watch.
