

Mobile Level 3 Standard Distribution Box

Article Overview

A Mobile Level 3 Standard Distribution Box is a rugged, portable power distribution unit designed for indoor and outdoor use, offering high safety, durability, and flexible amperage outputs.

Overview

A Mobile Level 3 Standard Distribution Box is engineered to provide temporary or decentralized power distribution in demanding environments such as industrial sites, entertainment events, or emergency setups. These units are typically compact, portable, and robust, with features that protect both personnel and equipment from electrical hazards, dust, water, and corrosion, meeting Type 3X enclosure standards for outdoor and indoor use (Lex Products) .

Key Features

- **Amperage Range:** Distribution boxes can handle a wide range of currents, typically from 20 to 800 Amps, with adjustable circuit breakers to match specific load requirements .
- **Portability:** Designed with side handles, compact frames, and space-saving layouts, making them easy to transport and deploy .
- **Durability:** Raised housing edges and rugged enclosures protect outlets and breakers from physical damage, while materials resist corrosion and ice formation .
- **Safety Standards:** Fully compliant with UL 1640 and cULus standards, ensuring safe operation in temporary or harsh environments .
