

# Mobile base station optical module price

## Article Overview

The price of mobile base station optical modules ranges from \$15–\$30 for standard third-party modules to \$150–\$2,000+ for OEM-branded modules, depending on type, brand, and technical specifications.

### Price Overview

- **Standard Third-Party Modules:** Basic 1G and 10G SFP modules typically cost \$15 to \$30. These are widely used in telecom networks for cost-effective deployments and are compatible with most base station equipment .
- **OEM Modules:** Modules from brands like Cisco, Juniper, or Arista can range from \$150 to over \$2,000, even with similar technical specifications. The higher cost is due to brand premium, proprietary firmware, and enterprise support .
- **Wholesale and Factory Options:** For large-scale deployments, especially in 2G, 3G, and 4G LTE networks, wholesale suppliers offer competitive pricing, which can reduce per-unit costs significantly .

### Market Context

- The global base station optical module market was valued at approximately USD 10.55 billion in 2025 and is projected to reach USD 22.57 billion by 2033, growing at a CAGR of 9.98% .
- China leads the market with a 28.9% share, and transceivers dominate the segment with 52.3% of global revenue .
