

Mongolian cable tray ladder type

Overview

The ladder-type cable tray is designed with two long side rails that are connected by evenly spaced rungs, resembling a ladder. This structure is especially useful for supporting heavy-duty cables over long distances. Our cable trays are long-lasting, resistant to corrosion, and suitable for use in any climate because they are made from high-quality aluminum and stainless steel in Mongolia. Our products are known for their sustainable performance and all the other features that. ventilation to heat producing cable such as power communication and other with the same or different width of the cable run. All fittings are available in sizes and types corresponding to the straight cable tray sections. A cable tray or ladder system is a critical infrastructure component used in commercial, industrial, and residential buildings to support, organize, and protect electrical power and telecommunications cables.
