

Multimode fiber optic patch cord ordering

Overview

Multimode patch cables achieve the greatest range at a rate of 100 Mbit/s. This is 2,000 m for OM1 to OM5., we will ship the items on the same day (Monday to Friday). Fibre optic patchcords are single-, dual-, or multifibre data cables that are factory-assembled with the commonly used fibre optic connectors – LC, SC, E-2000, MTP, SN, CS, MDC, etc. – and are used to connect IT hardware (e. switches, servers) equipped with fibre optic interfaces either directly. Thorlabs offers a variety of step-index and graded-index multimode fiber optic patch cables with standard FC/PC or SMA connectors, including square-core fiber. AR-coated and uncoated fluoride fiber optic patch cables are also available for mid-IR use, solarization-resistant cables for ultraviolet. Multimode simplex and duplex fiber patch cords are most commonly used in campus networks and other short distance applications. We can custom build any length and type of fiber you need and we'll ship the order typically within 1-2 days.
