

Myanmar DAC High-Speed Cable 400G

Overview

T&S Communication's 400G DAC cables deliver ultra-high-speed connectivity with QSFP-DD and breakout solutions. This technology eliminates the need for electro-optical conversions, reducing power consumption for data transmission. Ideal for data centers, these low-latency copper cables offer plug-and-play performance with lower power than optical alternatives - upgrade your network today. These cables consist of a twinax copper assembly terminated with industry-standard transceiver modules, such as. The T1-DAC-400G QSFP DD copper direct-attach cable is suitable for very short distances (up to 3m) and are used as a cost-effective solution for establishing a 400Gbps link between QSFP ports. DACs are widely used in data centers to connect servers and GPU compute systems to the top-of-rack (TOR) switches and link.
