

No internet connection when wireless router is plugged into fiber optic cable

Overview

3 Check and reset network settings. 7 Update your drivers on your Windows computer. 10 Turn off your. A router plays a crucial role in connecting your home or office devices to the internet, acting as the bridge between your modem and all your connected gadgets. When your router fails to connect to the internet, it disrupts your ability to browse, stream, work, or communicate, causing significant. Checking the router's Internet Protocol (IP) address is the key starting point — it tells you whether the problem is with the router itself or the modem. Video guides are also available below. If you work through all the steps and still need help, you can reach out through the TP-Link contact page. Your fiber internet comes through a thin glass cable from your Internet Service Provider. If you're not getting an internet connection, check your internet equipment before you troubleshoot anything else. Flow Chart If you are using a DSL modem router, please refer to the following FAQ first. Is your router not connecting to the internet?

This can be a frustrating and disruptive issue, but it's most likely an easy fix.
