

ONU Optical Network Unit High Temperature Resistance ODM

Overview

Industrial Desert Rugged 1GE ONU - Extreme Temp Resistant (-40°C~75°C)1. 10/100/1000Mbps auto adaptive Ethernet interfaces. Shenzhen. In the realm of Fiber-to-the-Home (FTTH) and other FTTx architectures, the Optical Network Unit (ONU) is a critical piece of customer-premises equipment (CPE). It acts as the essential bridge, converting the high-speed fiber optic signal coming into your home or business into a format that your. The Passive Optical Network (PON) is the indispensable foundation for delivering ubiquitous, multi-gigabit broadband connectivity, a necessity for modern economies and residential life. The shift from outdated electrical copper systems to optical fiber is driven by the immutable demands for. The Optical Line Terminal (OLT) is the central component of the PON system, typically housed at the service provider's central office. It functions like a router or switch in a traditional network but tailored for fiber optics. Its security and performance capability make this energy-efficient device suitable for industrial scenarios, such as power distribution suppliers, mines, oil and gas.
