

OTDR Fiber Optic Test Kit

Overview

Fluke Networks OptiFiber® Pro OTDR built for enterprise fiber optic cabling certification testing. It supports copper certification, fiber optic loss, OTDR testing and fiber end-face inspection. Many OTDRs designed for fiber troubleshooting are designed for carrier and contain cumbersome and complicated features. EXFO's Hollow Core Fiber OTDR Test Kit pairs a high-power OTDR with dedicated external PC analysis software—purpose-built to address HCF's. AFL's Test & Inspection suite offers technicians rugged, easy-to-use tools for inspecting fiber endfaces, identifying faults, measuring optical loss, and managing test workflows. The OTDR shoots a laser light down the optical cable and the laser emits a pulse of light at a specific wavelength, this pulse of light travels along the fiber being tested, as the pulse moves down the fiber portions. OTDR fibre optic cable tester to test, troubleshoot and certify.
