

Optical Power Meter 4G Remote

Overview

It is available in lithium battery version and lithium battery 4G remote version, with testing distances of 5km and 15km, and offers three testing ranges: $-70\sim+6\text{dBm}$, $-70\sim+10\text{dBm}$ and $-50\sim+26\text{dBm}$ for different construction and maintenance needs. The Y12 Series All-in-One Optical Power Meter and Visual Fault Locator combines OPM and VFL functions in one compact unit. Standard wired energy meters rely on RS485 cabling or stable local LAN networks. In a remote facility. KPM37 three phase wireless iot RS485 LoRa din rail 4G WiFi iot energy meter features a DIN 35mm rail mounting structure and an LCD display, integrating three-phase power parameter measurement, power quality analysis, and time statistics functions. It has the advantages of small size, high accuracy. Thorlabs' expanding line of optical power and energy meters includes a large selection of sensor heads, single- and dual-channel power and energy meter consoles, power and energy meter interfaces, a wireless power meter with a built-in photodiode sensor, and a fiber optic power meter designed for. EM114070 is a single-phase three-module prepayment electronic energy meter. it is a versatile device designed to measure total electricity consumption, voltage, line current, neutral current, active power, power factor, ambient temperature, and line temperature. It also displays date, time, version.
