

Optical module company Source acquired

Article Overview

Source Photonics was acquired by Suzhou Dongshan Precision Manufacturing on June 15, 2025.

Source Photonics, founded in 2001 and based in West Hills, California, is a manufacturer of optical transceivers, components, and subsystems for telecommunications and data networks. Its products include passive optical network (PON) subsystems, optical transceivers for enterprise, access, and metro networks, as well as other optical modules and components, supporting mobile and fixed-line access networks, metro networks, and data centers . The company has raised \$230 million in funding from investors including Beijing Vantone Real Estate and HaoMei New Materials . The acquiring company, Suzhou Dongshan Precision Manufacturing (DSBJ), is a Chinese manufacturer specializing in stamping and sheet metal products. Founded in 1998 and based in Suzhou, China, DSBJ produces a wide range of products for telecommunications, consumer electronics, industrial, medical, and automotive markets . The acquisition of Source Photonics strengthens DSBJ's presence in the optical communications sector, providing vertical integration in optical module manufacturing and expanding its global footprint. This acquisition reflects a broader trend in the optical module industry, where Chinese companies are increasingly consolidating and expanding their capabilities. Over recent years, Chinese optical module suppliers have grown in global competitiveness, with several companies, including Xutron, Huawei, and Solstice Optoelectronics, ranking among the top global suppliers . By acquiring Source Photonics, DSBJ gains access to advanced optical technologies, manufacturing expertise, and a stronger position in international markets.
