

Outdoor server rack with IP65 protection rating

Overview

Protect your servers and IT equipment with our outdoor server cabinet — IP65-rated, dustproof, and waterproof design for all-weather performance. Ideal for telecom, data centers, and edge computing. Rugged steel construction, efficient cooling options, and customizable sizes. AZE's 27U IP65 waterproof Outdoor Server Cabinet are designed to protect your sensitive network equipment from harsh environments, with waterproof and dustproof features to safeguard it from the elements, while still keeping the equipment secure outside. These are manufactured from galvanized steel, aluminum or stainless steel material, making them the perfect layer of security. Over the past year, demand for IP65-rated outdoor server racks has grown sharply—not because specs improved, but because more users now deploy network infrastructure in unconditioned spaces: utility poles, construction trailers, remote cell sites, and edge CCTV hubs. Made from powder-coated & welded cold rolled steel, they come in a variety of sizes with IP65 rating for extra.
