

Overseas Warehouse QSFP28 Optical Module 800G

Overview

The 800GBASE-DR8 OSFP Optical Transceiver Module is designed for 800GBASE Ethernet throughput up to 500m over singlemode fiber (SMF) with MPO-16 connectors. This transceiver is compliant with IEEE P802. QSFP (Quad Small Form-Factor Pluggable) optical modules emerged to meet this demand, becoming a pivotal technology for data center interconnects due to their compact size and exceptional performance. Fibrecross offers a wide range of speeds, from 10G, 25G, 40G, 100G, 200G, 400G, to 800G, and covers mainstream interface specifications such as SFP+, QSFP28. Optical transceivers, also known as fiber optic transceiver modules, convert electrical signals into optical signals and back again for high-speed fiber optic networks. The optical power read by the device is the average optical power, not the OMA optical power.
