

PLCN optical cable shelved

Overview

The Pacific Light Cable Network (PLCN) is a trans-Pacific submarine fiber-optic cable system spanning approximately 11,800 kilometers, providing high-capacity data transmission between Los Angeles, California, and landing points in Taiwan and the Philippines. PLCN aimed to offer the first direct submarine cable connectivity between Hong Kong and Los Angeles, the US, spanning approximately 13000 km, with the shortest. This interactive submarine cable map shows the global undersea fiber optic cables connecting world. Explore cable routes, landing stations and system status. Learn more about Pacific Light Cable Network (PLCN). Browse SubTel Forum's Cable System Index to explore current and planned submarine fiber. Comment Cycle Established, Application of GU Holdings, Inc. For a License to Construct, Land, and Operate an Undersea Fiber Optic Cable Connecting the United States, Hong Kong, Taiwan, and the Philippines (Pacific Light.
