

Pakistan installs 10G network security equipment

Overview

Islamabad, Pakistan – Pakistan's government has deployed Chinese technology to build what some senior officials familiar with the project are calling a new, national internet “firewall” that will allow authorities to monitor online traffic and regulate the use of popular apps with. Islamabad, Pakistan – Pakistan's government has deployed Chinese technology to build what some senior officials familiar with the project are calling a new, national internet “firewall” that will allow authorities to monitor online traffic and regulate the use of popular apps with greater control. There is reporting that network censorship equipment in Pakistan has been sourced from China since the second half of 2024. The “web management system” in Pakistan underwent a change in July and August 2024, which is believed to correspond with the activation of new Chinese equipment. The new. Buy TP-Link ER8411 Omada VPN Router with powerful 10G SFP+ ports and multi-WAN support for high-performance business networking. Designed for enterprises and ISPs, the ER8411 delivers ultra-fast wired speeds, advanced VPN security (IPSec/SSL/PPTP/L2TP), load balancing, and centralized cloud. Seven out of ten Pakistani businesses experienced a cyber attack in the last year, yet most are using decade-old security protocols. This guide will show you exactly how to future-proof your IT infrastructure without breaking the bank or drowning in technical jargon. Pakistan's unlawful mass surveillance and censorship expansion is powered by a nexus of companies based in Germany, France, United Arab Emirates (UAE), China, Canada, and the United States, Amnesty International said today in a new report “S...
