

Palau Communication Fiber Optic Cable Brand

Article Overview

The primary brand/operator of Palau's submarine fiber optic cables is the Belau Submarine Cable Corporation (BSCC).

The Belau Submarine Cable Corporation (BSCC) is a state-owned public corporation established in 2016 to manage Palau's international fiber optic connectivity . BSCC owns and operates the country's submarine cable network, providing wholesale broadband internet services and linking Palau to global internet hubs.

Cable Systems

- Palau Cable 1 (PC1): Launched in 2017, PC1 is Palau's first international submarine cable, connecting the islands to a branching unit of the SEA-US cable system in Guam. This 200 km cable significantly improved internet bandwidth and reliability compared to the previous satellite-based connections . The cable lands at the Ngeremlengui Cable Landing Station (CAP-N).
- Palau Cable 2 (PC2): Currently under construction, PC2 will connect Palau to the Echo submarine cable network, providing direct links to Singapore and the mainland United States. This second cable enhances redundancy and ensures more secure and reliable digital connectivity .
