

Papua New Guinea s First Bridge

Overview

At 66 meters long, dual-lane, and built without a centre pier, it is the first steel arch bridge ever constructed in Papua New Guinea, marking a significant leap in engineering technology for the nation. The Hawaiiin Bridge, rising along the Coastal Highway that links Wewak to Aitape, Vanimo, and onward to the Indonesian border at Wutung, is set to become a landmark in Papua New Guinea's infrastructure development. This remote location in the rugged highlands presented significant logistical challenges for. Papua New Guinea (PNG), officially the Independent State of Papua New Guinea, is an island country in Oceania that comprises the eastern half of the island of New Guinea and offshore islands in Melanesia, a region of the southwestern Pacific Ocean north of Australia. Upon its opening in November of 2005, the 1,289 foot (393 mtr) high bridge also became the highest bridge of any kind in the world, taking the.
