

Photovoltaic inverter module price

Article Overview

The price of photovoltaic inverters in 2025 typically ranges from \$800 to \$5,000, depending on the model and specifications.

Price Ranges for Different Inverter Types

- String Inverters:
 - Average cost: \$1,000 to \$3,000 for residential systems.
 - These are the most common type of inverter used in solar installations and are suitable for homes with minimal shading .
- Microinverters:
 - Average cost: \$1.15 per watt; for a typical 5 kW system, this amounts to approximately \$5,750.
 - Microinverters are ideal for roofs with panels oriented differently or exposed to partial shading, as they optimize the performance of each panel individually .
- Hybrid Inverters:
 - Average cost: \$1,000 to \$5,000 depending on the capacity and features.
 - These inverters combine solar and battery functions, making them suitable for off-grid systems or homes looking to integrate battery storage in the future .

Specific Model Prices

- Fronius Primo 5.0-1: Approximately \$1,500; known for its high efficiency (97.8%) and suitable for residential use.
- SMA Sunny Boy 7.7: Priced around \$2,000; offers an efficiency of 98.4% and is ideal for small homes.
