

Photovoltaic module power meter

Overview

A solar power meter measures the power output of solar panels by detecting the intensity of solar radiation. This tool is essential for assessing the efficiency and performance of solar power systems. Due to the fact that solar energy is nowadays one of the most important alternative. ✂ Professional-Grade PV Testing Measures maximum power (P_{max}) up to 1000W, open-circuit voltage (V_{oc} : 12-80V), and short-circuit current (I_{sc} : 35A) with $\pm 0.1\%$. ✂ MPPT Efficiency Optimization Tracks. From solar irradiance meters and photovoltaic testers for residential needs, to commissioning a new PV array or routine maintenance on a solar farm or photovoltaic power station, Fluke solar testing equipment has you covered. Featuring digital RS485 output and full compatibility with Modbus RTU, it's ideal for performance monitoring and PR (Performance Ratio) calculation in.
