

# Power Distribution Box Warning Sign in Computer Room

## Article Overview

A Power Distribution Box Warning Sign alerts personnel to high-voltage hazards and restricts access to authorized individuals in computer or server rooms.

### Purpose of the Warning Sign

The Power Distribution Box Warning Sign is designed to protect personnel from electrical hazards associated with power distribution units (PDUs) and electrical panels in computer rooms. These signs indicate the presence of high voltage, live circuits, and potential shock risks, ensuring that only trained or authorized personnel handle the equipment . They also help maintain compliance with OSHA and ANSI safety standards for workplace safety .

### Typical Design and Features

- **Warning Triangle:** A yellow triangle with a black lightning bolt symbol signals electrical danger .
- **Bold Text:** Phrases like "Warning! Electricity" or "Danger: High Voltage" are used to clearly communicate the risk .
- **Access Restriction:** Signs often include "Authorized Personnel Only" to prevent untrained individuals from entering the area .
- **Color Coding:** High-contrast colors such as red, yellow, and black are used for visibility in low-light or cluttered environments .
