

Power Fiber Optic Wireless Router

Overview

Our top overall pick is the Netgear Nighthawk RS700S, a Wi-Fi 7 router built for multi-gig fiber plans that handles up to 200 devices across 3,500 square feet. For budget-conscious households, the TP-Link Archer AX55 delivers reliable Wi-Fi 6 performance without the premium price. Fiber internet delivers the fastest speeds — up to 5Gbps. I'm Fazlay Rabby — the founder and writer behind Thewearify. Many major ISPs, such as Verizon and Xfinity, offer fiber connections directly to your door, known as FttP or Fiber. This review aims to unveil some of the best fiber optics routers on the market by focusing on their key features and showing how they would become efficient tools for both home and office networks. However, the market is flooded with countless options, making the selection quite overwhelming.
