

Price and dimensions of horizontal elbows for cable trays

Overview

Horizontal elbows provide directional transitions in cable tray systems, with 4"-7" rail heights, 6"-36" widths, and 12"-36" radii. Available in ladder and solid bottom aluminum designs. Ensure your cable tray solution is designed for your application, with our vast range of ladder tray fittings. A structural offset in the sidewall creates strong, mid span splices. Usage: is used to complete the whole project as it is one of the cable tray accessories, that make the cable go through all available space easily as it can go from path to another straight or curved, and the opposite, with different directions too. 5mm thickness, 60mm height, 300mm width. Aluminum electrical cable tray, Produced by BAHRA company. Used for changing the direction. The 30° Horizontal Elbow is an ideal choice for installations where large diameter cables are involved in long span situations. Aluminum construction provides a lightweight, high-strength, corrosion resistant offering well suited for almost any application.
