

Price chart for mesh cable tray assembly

Article Overview

Mesh cable tray assemblies typically range from \$20 to \$150 per straight section, with additional costs for fittings, couplers, and material type.

Price Overview

The cost of a wire mesh cable tray assembly depends on material, size, and included accessories. Common materials include:

- Pre-Galvanized Steel (PG): Most affordable, suitable for dry indoor areas like offices or schools.
- Hot-Dip Galvanized Steel (HDG): More expensive, ideal for outdoor or industrial environments due to corrosion resistance.
- Aluminum: Lightweight and moderately priced, reduces the need for heavy hangers.
- Stainless Steel: Highest cost, used in hygienic or corrosive environments such as food plants or coastal areas . Straight sections of mesh trays alone are relatively inexpensive, but the total assembly cost includes fittings, couplers, and installation labor . For example, a 50-pack wire mesh cable tray coupler kit for connecting sections can cost around \$50–\$100 depending on size and finish .

Factors Affecting Price

- Tray Size and Length: Larger or longer trays require more material and cost more.
- Material Finish: Electro-galvanized, hot-dip galvanized, or stainless steel finishes increase durability and price .
