

Price list for explosion-proof electrical distribution boxes in Poland

Article Overview

Professional explosion-proof electrical distribution boxes in Poland typically range from approximately €200 to over €2,000, depending on size, material, and certification.

Overview

Explosion-proof distribution boxes, also known as Ex junction or terminal boxes, are designed for hazardous areas where flammable gases, vapors, or dust may be present. They are certified under ATEX and IECEx standards for use in zones 1, 2, 21, and 22, ensuring safety and compliance in industrial environments . Materials commonly used include aluminum, stainless steel, and reinforced polyamide, providing corrosion resistance, mechanical strength, and durability under extreme conditions .

Price Factors

- **Material:** Aluminum boxes are generally more affordable than stainless steel, while reinforced polyamide or composite enclosures may fall in between .
- **Size and Capacity:** Larger boxes with more modules or terminals cost more due to increased material and internal components .
- **Certification and Compliance:** ATEX, IECEx, and sometimes UL or CSA certifications add to the cost, reflecting rigorous testing and compliance .
- **Included Components:** Boxes equipped with cable glands, terminals, and mounting kits are priced higher than empty enclosures .
