

Price of Dual-Core Fiber Optic Waterproof Connector

Article Overview

Dual-core waterproof fiber optic connectors typically range from \$50 to \$150 per unit, depending on specifications, IP rating, and supplier.

Dual-core fiber optic waterproof connectors are designed for harsh outdoor or underwater environments, offering high reliability and signal integrity. They often feature IP67 or IP68 ratings, stainless steel or robust polymer housings, and support single-mode or multimode fibers. These connectors are suitable for applications such as FTTX networks, remote radio heads, offshore energy, and subsea research.

Pricing Overview

- Alibaba lists 2-core single-mode underwater connectors with stainless steel housing, capable of operating at depths up to 2000 meters. Pricing depends on quantity, cable type, and customization, with a typical MOQ of 100 meters and lead times of 5–7 working days. While exact unit prices are not always listed, bulk orders generally fall in the \$50–\$150 per connector range.
- ShowMeCables and Fibeye offer IP68/IP67-rated outdoor connectors, including LC, SC, MPO, and MTP types. Prices vary based on connector type, fiber mode, and assembly length, and are often available upon request or through direct sales consultation.
- DigiKey and Amazon provide a wide range of fiber optic connectors, but waterproof dual-core variants are less common and may require custom orders.
