

Price of Fireproof Pre-fabricated Cable Tray Supports

Article Overview

The price of fireproof pre-fabricated cable tray supports varies widely depending on material, fire rating, load capacity, and supplier, typically ranging from \$50 to \$200 per support bracket, with full tray systems costing more.

Factors Affecting Price

Material: Supports made from stainless steel (304/316), hot-dip galvanized steel, or specialized aluminum alloys are more expensive due to durability and corrosion resistance . **Fire Resistance Rating:** Brackets and trays are rated for 60, 90, or 120 minutes of fire resistance (E60, E90, WS5X), with higher ratings increasing cost . **Load Capacity and Span:** Heavier-duty supports designed for high cable loads or longer spans require stronger materials and more robust design, which raises the price . **Certifications:** Products certified to UL, CE, ISO 834-1, EN 1363-1, DIN 4102-12, or AS/NZS 3013:2005 standards are generally more expensive due to testing and compliance costs . **Customization:** Pre-fabricated supports with adjustable or modular designs, or those tailored for unusual installation conditions, can cost more than standard models .

Typical Pricing Guidance

- Individual Support Brackets: \$50–\$200 per unit depending on material, fire rating, and load capacity.
- Full Tray Sections (3-meter lengths, 150–600 mm width): \$200–\$600 per section, with additional costs for fireproof coatings, powder coating, or stainless steel options .
