

Price of Fireproof and Flame-Retardant Cable Trays in Bhutan

Article Overview

Flame-retardant and fireproof cable trays in Bhutan typically range from \$20 to \$80 per meter, depending on material, fire rating, and supplier.

Overview

Flame-retardant and fireproof cable trays are designed to protect electrical and communication cables from fire, heat, and environmental damage. Common materials include fiberglass reinforced plastic (FRP/GRP), galvanized steel, and powder-coated aluminum, often with intumescent or fire-resistant coatings to enhance fire protection. These trays are widely used in industrial plants, hospitals, airports, substations, and high-rise buildings.

Price Range

- FRP/GRP Cable Trays: Typically \$20–\$50 per meter, lightweight, corrosion-resistant, and suitable for outdoor and high-humidity environments.
- Fire-Rated Steel or Aluminum Trays: Usually \$40–\$80 per meter, offering higher load capacity and compliance with fire safety standards such as ISO 834-1, EN 1363-1, and DIN 4102-12.
- Custom or Arc-Shaped Fire-Resistant Trays: Prices may exceed \$80 per meter due to specialized design, coatings, or structural features. Prices vary based on tray width, thickness, load rating, fire resistance duration, and supplier location. Shipping costs to Bhutan may also affect the final price, especially for imported trays from China, India, or the UAE.
