

Price of High-Pressure Sealed Cable Trays

Article Overview

High-pressure sealed cable trays typically range from \$50 to \$300 per meter, depending on material, type, and load capacity.

High-pressure cable trays are designed to support and protect electrical cables in industrial and commercial settings, offering durability, heat dissipation, and customizable configurations such as bends, tees, and risers. Prices vary significantly based on material: steel (galvanized or powder-coated) is the most robust and often used for heavy-duty applications, aluminum is lighter and corrosion-resistant, and fiberglass provides electrical insulation for sensitive environments.

Factors Affecting Price

- **Material:** Steel trays are generally more expensive than aluminum or fiberglass due to higher strength and load capacity.
- **Type:** Ladder trays, solid-bottom trays, trough trays, and wire mesh trays differ in construction and protection level, influencing cost.
- **Finish:** Hot-dipped galvanized or powder-coated finishes increase durability and price.
- **Size and Load Capacity:** Wider trays or those designed for heavy-duty applications cost more.
- **Accessories:** Couplers, bends, risers, and lids add to the overall system cost.
