

Price of Level 3 Electrical Distribution Box at Construction Sites

Article Overview

Construction site Level 3 electrical distribution boxes typically range from \$500 to \$2,500 depending on capacity, materials, and included components.

Price Range and Factors

The cost of a Level 3 distribution box varies widely based on enclosure material, internal components, and certifications. Basic plastic or ABS units may start around \$200–\$500, while industrial-grade, pre-wired, or stainless steel boxes with integrated circuit breakers, surge protection, and modular features can reach \$1,500–\$2,500 or more per unit. Outdoor-rated boxes with IP65–IP67 waterproofing and shock-resistant construction are generally at the higher end of this range.

Key Features Affecting Cost

- **Material:** Thermoplastic, ABS, powder-coated steel, or stainless steel enclosures influence durability and price.
- **Internal Components:** Pre-installed breakers, busbars, surge protectors, and monitoring modules increase cost.
- **Certifications:** CE, IEC, or NEMA compliance ensures safety and suitability for construction environments.
- **Capacity:** Higher amperage ratings and more circuits require larger, more expensive boxes.
- **Portability and Security:** Lockable lids, stackable designs, and rubberized enclosures add convenience and protection, affecting price.
