

Price of Low-Voltage Primary Distribution Box Components

Article Overview

Low-voltage primary distribution boxes typically range from \$2,600 to \$3,500 per unit, with prices varying based on type, capacity, and smart features.

Typical Pricing

- Standard Floor-Type LVDBs: Average price around \$2,635 per unit, suitable for industrial and commercial applications, with capacities up to 630A and breaking capacity of 15kA .
- Modular or Smart-Enabled Units: Prices can increase by 8-12% for IoT-enabled monitoring, arc-flash detection, or remote communication capabilities .
- Wholesale or Bulk Orders: Per-unit costs decrease with larger orders, especially for OEM or custom enclosures .

Factors Affecting Price

- Type of Distribution Box: Wall-mounted units are generally less expensive than floor-mounted or modular units due to lower material and installation requirements .
- Material: Metal enclosures are more costly than plastic or composite alternatives .
- Capacity and Phase: Single-phase units are cheaper than three-phase units; higher current ratings increase cost .
- Smart Features: Integration of digital metering, predictive maintenance, and IoT modules elevates the price compared to conventional passive enclosures .
