

Price of Mongolian Fiber Optic Cable Rewinding Machine

Article Overview

Fiber optic cable rewinding machines typically range from \$3,000 to \$25,000 depending on automation, capacity, and supplier, with Mongolian prices likely influenced by import costs and local availability.

Price Range and Factors

The cost of a fiber optic cable rewinding machine varies widely based on automation level, production capacity, and technical specifications. Basic manual or semi-automatic machines suitable for small-scale operations or field use generally start around \$3,000-\$7,000, while fully automated, high-speed machines for industrial-scale production can exceed \$20,000-\$25,000 (Alibaba, Accio, Made-in-China) . Key factors affecting price include:

- Automation Level: Manual, semi-automatic, or fully automatic with PLC control and integrated cutting or length measurement functions.
- Reel Capacity: Maximum reel diameter and weight the machine can handle.
- Tension Control: Advanced servo or closed-loop systems for delicate fiber handling.
- Speed and Accuracy: Machines with high rewinding speeds (up to 200 m/min) and precise length counters cost more.
- Brand and Components: Machines using Siemens, Omron, or CNC-machined parts are more reliable but pricier.
