

Price of Zinc-Aluminum-Magnesium Cable Trays in Israel

Article Overview

Zinc-Aluminum-Magnesium (ZAM) cable trays are premium corrosion-resistant systems, and their price in Israel typically ranges from \$50 to \$150 per meter depending on size, type, and supplier.

Overview of ZAM Cable Trays

ZAM cable trays are made from steel coated with a zinc-aluminum-magnesium alloy, offering superior corrosion resistance compared to standard galvanized trays, making them ideal for outdoor, humid, or coastal environments. They are widely used in industrial, commercial, infrastructure, and renewable energy projects, including solar and wind farms. Standard configurations include ladder-type, tray-type, and channel-type designs, with optional organic coatings for enhanced durability.

Factors Affecting Price

- **Tray Type and Size:** Ladder trays, perforated trays, and solid-bottom trays vary in cost. Larger widths and higher side rails increase material usage and price.
- **Load Capacity:** Trays designed for heavier cable loads (e.g., 300 kg/meter) are more expensive due to thicker steel and stronger coatings.
- **Customization:** Factory-direct or OEM options, including specific lengths, bends, and accessories, can increase the price.
- **Shipping and Import Costs:** Since most ZAM trays are manufactured in China, import duties, shipping, and local distribution in Israel can significantly affect the final cost.
