

Price of fiber optic cable for fire protection

Article Overview

Firefighting-grade fiber optic cables, typically armored or ruggedized, cost between \$0.50 and \$6 per foot depending on type, strand count, and installation requirements.

Material Costs

- Single-mode fiber (OS2): \$0.10–\$0.50 per foot for standard indoor/outdoor cables; higher-end bulk orders can range \$0.30–\$2.80 per meter depending on fiber count and brand quality .
- Multimode fiber (OM3/OM4): \$0.30–\$1.00 per foot for standard cables; high-performance or data center-grade cables can reach \$1.50–\$6 per foot .
- Armored or ruggedized cables: Designed for harsh environments like firefighting scenarios, these cables cost \$0.50–\$5 per foot for standard armored types, with some specialty armored cables reaching \$6 per foot or more .

Factors Affecting Price

- Fiber Count: Higher strand counts increase costs. For example, a 12-strand cable may cost \$0.50 per foot, while a 24-strand cable can reach \$1.00 per foot .
- Construction and Rating: Indoor riser-rated cables are cheaper than plenum-rated or direct-burial armored cables. Firefighting applications often require armored, water-resistant, and UV-resistant jackets .
