

Price of fireproof cable trays for fire protection in Taiwan

Article Overview

Fireproof cable trays in Taiwan typically cost between \$10 and \$50 per meter, depending on material, type, and coating.

Price Range and Factors

The cost of fireproof cable trays varies based on material, design, and surface finish. Common materials include:

- Steel (galvanized or powder-coated): \$10–\$30 per meter, offering durability and moderate cost .
- Aluminum: \$20–\$50 per meter, lightweight and corrosion-resistant .
- Stainless steel: Higher-end option, suitable for corrosive environments .
- FRP (Fiber Reinforced Plastic): Non-metallic, fire-resistant, and lightweight, often used in specialized applications . The type of tray also affects pricing:
- Ladder trays: Stronger, suitable for heavy cables, slightly higher cost .
- Perforated trays: Moderate cost, good for ventilation and lighter loads .
- Wire mesh trays: Cost-effective, lightweight, and easy to install . Coatings such as powder coating or hot-dip galvanization increase durability and fire resistance, which can raise the price . Bulk orders or project-based procurement often reduce the per-meter cost.
