

Price of horizontal bend cable trays

Waterproof and dustproof, reliable and safe

The outer classic sink design allows the sealing ring of the cabinet and door to be seamlessly compressed without leaving a trace of gaps

Article Overview

Horizontal bends for cable trays typically range from \$10 to \$150 per piece depending on type, material, and size.

Overview of Horizontal Bends

Horizontal bends are essential components in cable tray systems, allowing cables to change direction smoothly without damaging the wires. They are available in various types: equal welded bends, unequal welded bends, and series bends, each suited for different installation layouts and space constraints. Materials commonly used include aluminum, stainless steel, and galvanized steel, which affect both durability and price.

Price Ranges

- Standard 90° horizontal bends: Prices generally range from \$10 to \$50 per piece for smaller sizes and standard materials like galvanized steel.
- Larger or heavy-duty bends: For industrial applications or thicker materials (1.3–2.5 mm hot-dip galvanized), prices can go up to \$100–\$150 per piece.
- Custom or non-standard bends: Prices vary depending on dimensions, angle, and material, and suppliers often provide quotes on request.

Suppliers and Sources

- IndiaMART and ExportersIndia list multiple suppliers in India, including Humaira Enterprises, Bajiya Industrial Corporation, and Maheshwari Electricals, who provide horizontal bends and related fittings.
