

Price of low-voltage cable trays in New Zealand

Article Overview

Low voltage cable trays in New Zealand typically range from NZD 50 to NZD 300 per 3-meter section, depending on type, material, and supplier.

Types and Materials

Cable trays come in several types, each affecting cost:

- **Ladder Cable Trays:** Ladder-like design with rungs, ideal for heavy cables and excellent ventilation. Common in industrial and commercial installations .
- **Wire Mesh/Basket Trays:** Lightweight, flexible, and easy to route around obstacles. Suitable for data and power cables in offices or data centers .
- **Trough/Perforated Trays:** U-shaped or rectangular, offering maximum protection from dust and EMI, but may have limited ventilation . Materials include pre-galvanized steel, hot-dip galvanized steel, stainless steel, and Zn-Mg-Al alloy-coated steel, with corrosion resistance and durability influencing price .

Price Factors

- **Length and Width:** Standard sections are usually 3 meters long; wider trays cost more.
- **Material:** Stainless steel and alloy-coated trays are more expensive than standard galvanized steel .
- **Supplier and Brand:** Brands like Stern, FDG, and EzyTray may have premium pricing due to durability and compliance with standards .
