

Price of under-reverse cable tray elbow

Article Overview

The price of a cable tray elbow typically ranges from \$15 to \$100 or more depending on size, material, and supplier.

Overview

Cable tray elbows, including under-reverse or horizontal/vertical bends, are essential for routing cables around corners in electrical installations. They are available in materials such as galvanized steel, stainless steel, aluminum alloy, and fiberglass-reinforced plastic (FRP), which affects the price and durability. Standard sizes like 100mm or 300mm widths are commonly stocked, while custom sizes may incur additional costs.

Price Range

- Small standard elbows (100mm width, steel): Approximately \$15–\$30 per piece.
- Medium to large elbows (300mm width, galvanized or aluminum alloy): Prices can range from \$50–\$100 per piece depending on material and finish.
- Custom or heavy-duty elbows: Prices may exceed \$100, especially for stainless steel or specialized coatings for outdoor or industrial environments.

Factors Affecting Price

- Material: Stainless steel and aluminum alloys are more expensive than standard galvanized steel.
- Size: Larger widths and heights increase material usage and cost.
