

Pricing Scheme for Aerial Optical Cable Laying

Article Overview

Aerial fiber optic cable installation typically costs between \$1.20 and \$7 per linear foot, depending on cable type, strand count, and installation complexity.

Typical Cost Ranges

- Per-foot pricing for aerial deployment: \$1.20 – \$2.50 per foot for standard utility pole installations, including pole attachment permits . Self-supporting ADSS cables may cost \$3 – \$7 per foot installed, depending on tensioning and hardware requirements .
- Total project costs: For commercial aerial runs, expect \$40,000 – \$60,000 per mile, with smaller business connections ranging from \$15,000 to \$30,000 for 100–200 network drops .
- Material costs: Single-mode fiber is generally less expensive than multimode, but multimode OM5 fiber can be ~25% higher than OM4 . Armored cables for outdoor or direct-burial applications add \$3–7 per foot, while conduit systems may add \$2–4 per foot .

Factors Affecting Pricing

- Fiber Type and Strand Count: Single-mode vs multimode, and the number of strands (e.g., 12, 24, 48, up to 1,728) influence both material and labor costs .
- Installation Complexity: Pole attachment hardware, precise tensioning, and environmental conditions (wind, ice, or urban congestion) can increase costs .
