

Qatar deploys mobile fiber optic cable on the streets

Overview

Ooredoo Qatar announced the deployment of the first quantum-safe communications link in Qatar, a project the company says establishes a foundation for next-generation cybersecurity and secure digital infrastructure in the country. Qatari national telecom provider Ooredoo is spinning off its international cable division. The move is an attempt to capture rapidly growing demand for high-performance data routes from hyperscalers – companies that require huge amounts of compute capacity and connectivity to train AI models. According to the Qatar Tribune, the initiative was developed in. Nokia has deployed 25Gbps-capable PON-based fibre broadband access technology for Vodafone Qatar in the Msheireb Smart City district. The Msheireb Downtown Doha project is described on its website as “the world's first fully built smart and sustainable city district”. Vodafone Qatar claims that its. Ooredoo Qatar has announced the upcoming launch of fibre-to-the-room (FTTR) services for residential customers, claiming a national first. Also Read: Oredoo Qatar. Through its visionary and collaborative approach to the market, QNBN is set to help empower the nation with high-speed broadband fiber optic broadband infrastructure by providing access to citizens and businesses alike. Broadband fiber optics enhances public safety information and procedures for.
