

Quality of Network Cabinets in West Africa

Article Overview

Network cabinets in West Africa are generally high-quality, locally manufactured, and designed to meet professional standards for durability, environmental protection, and modularity.

Material and Build Quality

Many cabinets available in West Africa, such as the Apollo Wall Mounted Server Cabinets, are constructed from high-quality cold-rolled steel, providing structural rigidity for 19-inch rack-mounted equipment . Cabinets often undergo a 7-tank dip treatment including degreasing, pickling, and phosphating, followed by a matte epoxy powder coating, ensuring long-term resistance to corrosion and physical wear in diverse African climates . Other brands, like Modac and Actsys, also use cold-rolled steel for durability and environmental protection .

Certifications and Standards

Professional-grade cabinets in the region comply with international standards. For example, Apollo cabinets are SITA certified and RoHS compliant, meeting both government tender requirements and environmental safety expectations . Many cabinets are manufactured according to international environmental standards, offering sealing effectiveness and moisture protection suitable for outdoor or industrial conditions .
