

Quick Line to Distribution Box

Article Overview

To connect a quick line to a distribution box, attach the incoming live, neutral, and ground wires to the main terminals, secure circuit breakers, and ensure proper labeling and insulation for safety.

Step-by-Step Connection Process

1. Safety First: Always turn off the main power supply before starting any installation to prevent electrical shock (). 2. Mount the Distribution Box: Secure the box to a stable wall or surface at an accessible height, ensuring it is free from obstructions and away from water, flammable, or corrosive substances (). 3. Prepare the Wires: Strip the insulation from the incoming quick line wires, leaving enough exposed conductor to make a secure connection. Typically, the wires include:

- Live (L): Usually brown or red
- Neutral (N): Usually blue
