

Recommended Dutch Quality Cable Trays

Article Overview

Stago, SILTEC, Trayco, and All-Rack offer high-quality Dutch cable trays suitable for commercial, industrial, and data center applications.

Stago Cable Trays

Stago cable trays are manufactured in the Netherlands and are known for their strength, flexibility, and installation efficiency. They feature double return flanges and reinforced tray designs for high load capacity and cable safety. The Unilock coupling system allows quick assembly with electrical continuity for equipotential bonding. Stago trays are available in perforated, reinforced, or closed designs, multiple heights, widths, and thicknesses, and can be supplied in custom RAL colors. They are fire-resistant (DIN 4102-12 certified for E30, E60, E90) and supported with BIM models and Environmental Product Declarations (EPD). Applications include commercial buildings, industrial installations, and data centers.

SILTEC Stainless Steel Cable Trays

SILTEC trays from CC Nederland B.V. are made of high-quality stainless steel (AISI 304), offering excellent corrosion resistance and durability. They come in lengths of 3000 mm, widths from 25 mm to 600 mm, and heights from 25 mm to 125 mm, with custom dimensions available. The rounded design protects cables and hoses, and the patented locking system ensures secure fastening while allowing easy access for maintenance. These trays are flexible to expand and suitable for various industrial and commercial applications.
