

Request a quote for 4U cold aisle server room

Overview

Fill out the Request Quote form with details on your projects. Contact us if you need to ask design or specification questions. Designed for data centers and IT environments, our hot aisle and cold aisle containment systems help isolate airflow, optimize temperature control, and protect critical equipment. Cool Shield™ containment offers state-of-the-art hot and cold aisle containment solutions designed to maximize data center efficiency while significantly reducing. A new generation of highly integrated small-scale micro-module data center solutions, using the cabinet as the carrier of the computer room, fully integrating all subsystems such as UPS, air conditioning, power distribution, lightning protection, fire protection (optional), wiring, airflow. PortaFab's pre-engineered walls, ceilings, and containment components are used at colocation data centers sites to enhance security, optimize airflow, and lower energy costs. Whether it functions individually or in collaboration with other units, this rack system can adapt to a range of setups. Cold aisle enclosures seal in cold air and prevent mixing of cold and hot server exhaust air Bespoke end of aisle containment doors.
