

Rigid iron wire for optical fiber cables

Overview

A SWA Fiber Optic Cable, or Steel Wire Armoured Fibre Optic Cable, is a type of armored fiber cable designed to provide mechanical protection while maintaining high-speed data transmission performance. Each optical cable is constructed using a precise combination of optical fibers, strength members, buffer tubes. Browse AFL product catalogs in PDF format fiber optic cable, connectivity, splicing, inspection tools, energy and enterprise solutions by category. Reinforcing elements in optical cables are used to withstand the axial stresses due to the laying, the working conditions or to the thermal variations, thus preventing that the same are passed on to the fibres. Strong mechanical protection, factory supply, OEM support available.
