

Router has no internet connection and the fiber optic port light is red

Overview

Solid red signals no internet connection. When it's green and steady, everything is fine. However, when it blinks red or stays solid red, it signifies a Loss of Signal, a problem preventing your router from communicating. That blinking red LOS light means your router has lost its connection to your internet provider's network. Before you panic or call tech support, there are several simple fixes you can try at home that often solve this problem in minutes. ". If your fibre internet is not working, the quickest fix depends on the lights on your fibre box (ONT), router, or the behaviour you are experiencing. This article explains the common causes, step-by-step troubleshooting methods, and when to contact your broadband provider to restore your internet. When the internet light is red, there is a problem with our internet connection that needs to be fixed as soon as possible.
