

Sales of long-span cable trays

Article Overview

Long-span cable trays are experiencing growing demand due to large-scale infrastructure projects, industrial automation, and data center expansion, with a wide range of suppliers offering customizable, durable, and fire-resistant solutions.

Product Types and Materials

Long-span cable trays are designed for heavy loads and extended spans, typically ranging from 3 meters to 50 feet, depending on the system and material . Common types include:

- Ladder trays: Provide open rungs for airflow and easy cable entry, suitable for long spans and large-diameter cables .
- Channel trays: Reinforced side plates increase load capacity for long-span installations .
- Wire mesh trays: Lightweight, ventilated, and corrosion-resistant, ideal for industrial and data center applications . Materials used include hot-dip galvanized steel, stainless steel (304/316), aluminum alloys, and powder-coated finishes, offering corrosion resistance, fireproofing, and long service life .

Market Trends and Drivers

The global cable tray market is expanding, driven by:

- Infrastructure and data center growth: Large-scale projects require efficient cable management with fewer supports .
- Cost and labor efficiency: Long-span trays reduce installation time and material costs.
