

# Samoa Secondary Distribution Box Installation

## Article Overview

Secondary distribution boxes in Samoa are typically installed as prefabricated substations (ZBW type) with integrated transformers and switchgear, designed for safe, reliable operation in urban and industrial environments.

### Equipment Overview

A ZBW-type prefabricated substation is a complete distribution unit combining high-voltage switchgear, distribution transformers, low-voltage switchgear, energy metering devices, and power factor compensation equipment in one or multiple boxes. These units are suitable for urban high-rise buildings, residential areas, industrial sites, airports, docks, and infrastructure projects. Transformer capacities range from 50 kVA to 1600 kVA, with a rated frequency of 50 Hz.

### Installation Environment

The installation site must meet the following conditions:

- Ground capable of supporting 20 tons of pressure.
- Altitude  $\leq 1000$  meters.
- Ambient temperature between  $-25^{\circ}\text{C}$  and  $40^{\circ}\text{C}$ .
- Relative humidity  $\leq 90\%$  (monthly average at  $25^{\circ}\text{C}$ ).
- Wind speed  $\leq 34$  m/s and ice thickness  $\leq 20$  mm.
- Pollution level II or III.
