

Senegal OLT Optical Line Terminal 1G

Overview

OLT3610-08GP4S GPON Optical Line Terminal (OLT) consists of 8× GPON ports, 4× GE COMBO ports, 4× GE SFP PORTS, 4× 10GE SFP+ ports, 1× CLI port, and 1× MGMT port. It is easy to install and maintain a GPON deployment. Our Total Access 5000 Series (TA5000) is a traditional yet highly extensible chassis-based OLT system. Focused primarily on the needs of regional and municipal network operators, it's environmentally hardened and operationally deterministic in design. With FS's GPON Optical Network Unit (ONU), the OLT3610-08GP4S can provide. PONs use passive optical splitters to split and distribute the optical signals from the Optical Line Terminal (OLT) to multiple ONUs. However, the splitters themselves do not perform any active processing or signal routing. Upgrade to gigabit symmetric services today and prepare for tomorrow's technologies. x and FSAN, which is a 1U rack-mounted device with one USB interface, four uplink GE ports, four uplink optical ports, two 10-gigabit uplink ports and four GPON ports.
