

Single 4-core optical cable

Overview

4-Core Single mode Fiber Optic Cable also called 4-core Optical fiber cable, is a type of communications optic cable which has the same transmission speed as light. They are used to connect final user to FTTH or GPON line. With models having various core counts, they offer a wide range of. Imm (main cord) Material Stainless Steel Color Silvery White UL94 V-0 (*Burning stops within 10 seconds on a vertical specimen, no drips of flaming particles. Since most network hardware uses a "Duplex" system (requiring two fibers: one to Transmit and one to Receive). Among the various configurations available, the 4 core single mode fiber optic cable stands out as a balanced solution—offering sufficient capacity for medium-scale networks without the complexity and cost of higher-core-count cables. As demand grows, understanding the factors influencing the 4.
