

Single-mode fiber optic patch cord 1um

Overview

With LC to LC connectors, the FCA-S1SR-LCLC-01M fiber patch cable from L-com is ready for deployment in any single mode OS1 9/125 network. This single mode, simplex fiber cable is comprised of corning optical fiber with ceramic connectors. Also available are single mode patch cables with AR-coated FC/PC or FC/APC connectors for improved fiber-to-free-space coupling. Fiber patch cables provide interconnect and cross-connect of applications over data centres, telecommunication networks, and enterprise environments. Pre-terminated cables allow for the implementation of complete plug & play solutions to install even large cabling systems rapidly. Designed for use with lasers from 450 - 1650nm in 1m, 2m and 5m standard. Single Mode 9/125 (OS2) fiber optic cables are used for single mode applications intended to run long distances due to the low rate of attenuation that results from the single projected light source.
